

Sistemul Fly Plus

Fly Plus System

Este un sistem ce cuprinde 6 bochete Whirpool, puse în funcțiune cu ajutorul unei comenzi pneumatice, ce conferă sistemului siguranță în exploatare. Prin utilizarea sa aveți posibilitatea de a regla amestecul de apă / aer pe fiecare bochetă a acestuia printr-o simplă rotire a rozetelor din interior. Această operațiune oferă posibilitatea reglării presiunii din gurile de hidromasaj la intensitatea dorită asupra diverselor zone ale corpului oferind astfel un plus de confort. Consola de operare conține:

- un buton pneumatic pornire / oprire
- regularorul de aer: prin rotirea stanga / dreapta a acestuia se efectuează reglajul amestecului de aer / apă

It is a 6 jets Whirpool system, powered by a pneumatic command, conferring the system safety in operation. Using this system you may adjust the water-air mixture for each jet simply by rotating the nozzle inside. This operation offers you the possibility of adjusting the pressure in the jets at the desired intensity over different areas of the body, thus giving a plus of comfort. The operation panel contains:

- a pneumatic on/off button
- an air pressure adjuster: by rotating it to left/right you can adjust the water/air mixture.

Sistemul Benessere

Benessere System

Reprezintă evoluția sistemului Fly Plus. Față de cele 6 guri de hidromasaj Whirpool mai apar două opțiuni: aromaterapie și igienizare. Lângă regulatorul de aer și pulsantul cunoscute de la sistemul de bază mai apar :

- capacul rezervorului de soluție pentru aromaterapie. Funcția de aromaterapie se activează introducând lichid în instalație. Esența va fi preluată de instalația de aer și va fi introdusă în sistemul de hidromasaj.
- capacul rezervorului de soluție pentru igienizare. Funcția de igienizare se activează introducând lichid de dezinfecție sau pastila în instalație. Soluția va fi preluată de instalația de apă și va fi introdusă în sistemul de hidromasaj. Se recomandă efectuarea în gol a unui ciclu de hidromasaj de 15-20 minute pentru curățare, după care se golește cada.

It represents the evolution of the Fly Plus system. Comparing to the 6 jets of the Whirpool Hydromassage, we have two more options: aromatherapy and sanitation. Besides the air adjuster and pulsating button already known from the main system, we have:

- the aromatherapy tank lid. The aromatherapy function is activated by introducing liquid in the system. The essence is carried by the air installation into the hydromassage system.
- the sanitation solution lid. The sanitation function is activated by introducing the disinfection liquid or tablet in the installation. The solution is carried by the water installation and introduced in the hydromassage system. For cleaning purposes it is recommended to perform a blank hydromassage cycle of 15-20 minutes, followed by emptying the bathtub.

Sistemul Digit Clean

Digit Clean System

Digit Clean include pe lângă sistemul inițial Fly Plus funcția de curățare. Noutatea acestui sistem constă în faptul că pornirea și oprirea acestuia se efectuează printr-o comandă digitală. Sistemul este prevăzut cu un senzor de nivel, acesta împiedicând pornirea pompei în cazul în care apa nu depășește suficient nivelul bochetelor și cu un senzor de prezență a tensiunii în rețea.

Pe consolă sunt prezente două taste:

- una pentru acționarea sistemului de hidromasaj
- una pentru acționarea sistemului de igienizare.

The Digit Clean system includes the main Fly plus hydromassage system and an electronic sanitation system. The novelty is the digital keypad used for activate/desactivate the hydromassage. On the control panel there is an electronic signalling led for the voltage of the system and a water level signalling led: the pump doesn't start if there is not enough water in the bathtub.

On the control panel you can find two keys:

- one for the hydromassage system
- one for the cleaning system

Sistemul Duotronic

Duotronic System

Sistemul Doutronic include:

- Tastieră de comandă digitală
- 6 bochete whirpool
- Senzor de nivel ce împiedică pornirea pompei în cazul în care apa nu depășește suficient nivelul bochetelor.
- Sistemul Airjet
- Cromoterapie

Pe consola de comenzi este prezent un led de semnalizare electronică a tensiunii în sistem precum și un led de semnalizare a nivelului necorespunzător al apei în cadă.

The Duotronic System includes:

- One digital command keypad
- 6 whirlpool jets
- Water level sensor to prevent the pump to start in case the water is not sufficiently over the level of the jets.
- Airjet system
- Chromotherapy

On the control panel there is an electronic signalling led for the voltage of the system and a water level signalling led.

Sistemul Combi Top

Combi Top System

Sistemul este acționat de o tastieră electronică.

Elementele pe care le include acest sistem sunt:

- Hidromasaj cu 6 bochete Whirpool
- Sistem electronic de igienizare
- Efect pulsant al hidromasajului: prin apăsarea tastei „PULSE” se poate obține efectul Wave - de valuri
- Sistem de cromoterapie cu un far
- Sistem Airjet
- Senzor de nivel
- Led de prezență a tensiunii în rețea

The system is powered through an electronic keypad.

This system includes the following elements:

- Hydromassage with 6 whirlpool jets
- Electronic sanitation system
- Hydromassage pulsing effect: you can obtain the wave effect by pressing the "Pulse" key
- One spot Chromotherapy system
- Airjet System
- Water level sensor
- Led for the voltage of the system

Sistemul Combi Multifunction

Combi Multifunction System

Sistemul este acționat de o tastieră electronică ce poate fi montată pe cadă sau poate fi amplasată în plan vertical (tastieră satelit)

Elementele pe care le include acest sistem sunt:

- Hidromasaj cu 6 bochete Whirpool
- Sistem electronic de igienizare
- Radio Fm : cu programare a memoriei și afișaj electronic
- Programare a duratei sistemului de hidromasaj, cu indicarea timpului rămas
- Efect pulsant al hidromasajului : prin apăsarea tastei „ PULSE” se poate obține efectul Wave - de valuri
- Sistem de cromoterapie cu un far
- Sistemul Airjet dispus în pardoseala căzii.

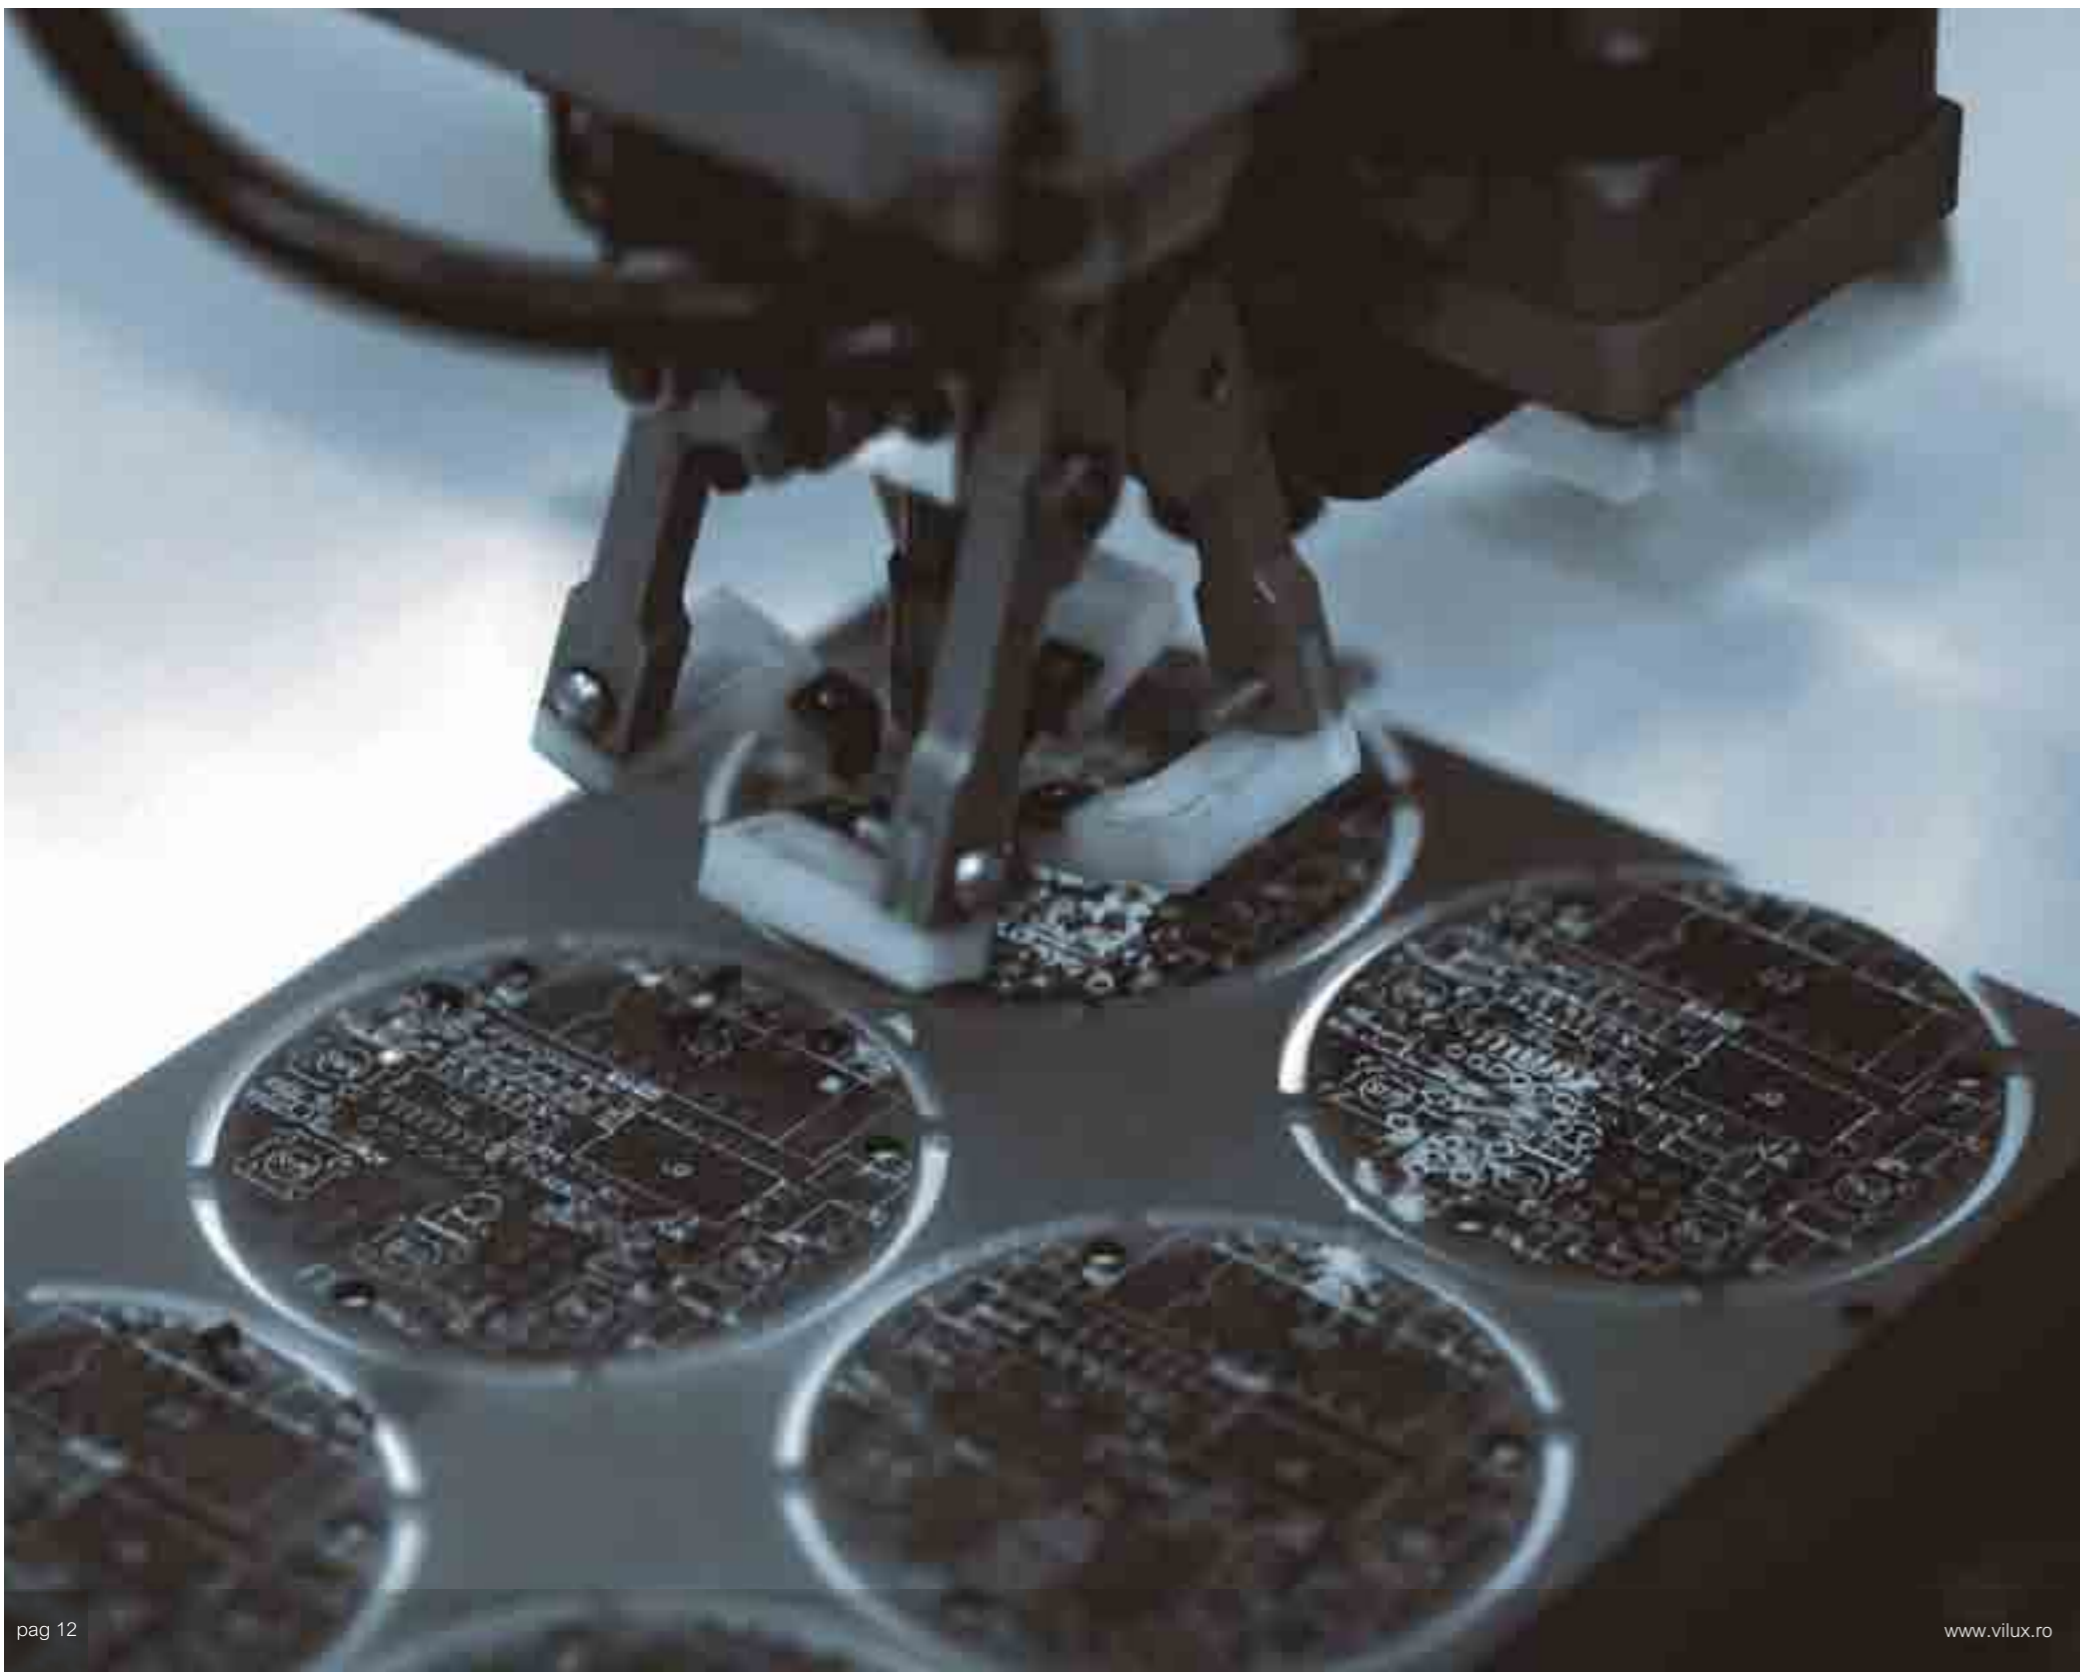

Acționarea acestuia se face apăsând tasta AIR, asigurând astfel clientului un hidromasaj tridimensional.

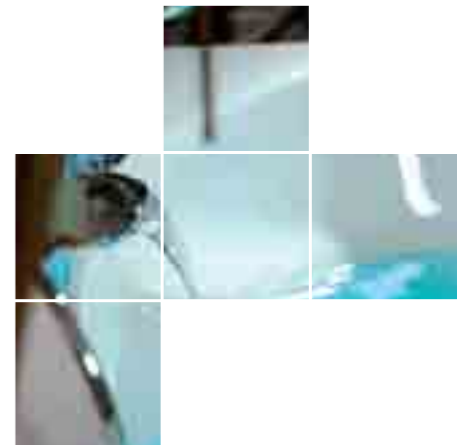

The system is powered through an electronic keypad that can be mounted on the bathtub or placed vertically (satellite keypad)

This system includes the following elements:

- Hydromassage with 6 whirlpool jets
- Electronic sanitation system
- FM Radio: with memory programming and electronic display
- Programmable hydromassage session, with remaining time indication
- Hydromassage pulsing effect: you can obtain the wave effect by pressing the "Pulse" key
- One spot Chromotherapy system
- Airjet system, placed on the bottom of the bathtub. This system is actuated by pressing AIR key, thus providing the customer a tridimensional hydromassage.

Elemente optionale - căzi
optional elements - bathtubs

Cromoterapia

Chromoterapy

Este universal cunoscut efectul benefic al radiației luminoase asupra echilibrului fizic și psihic. A vă expune energiei culorilor nu înseamnă numai a vă îngriji de aspectul fizic, ci și de sfera emoțională. Fiecare culoare poate influența în mod pozitiv starea de spirit și poate reechilibra metabolismul celular.

The positive effect of the luminous radiation over the physical and psychical balance is world wide known. To expose you to the energy of the colours means not only to take care of the look, but also of the emotional area. Each colour may positively influence your mood and may rebalance the cellular metabolism.

Airjet

Generează un masaj blând și relaxant prin intermediul jeturilor de aer.

Aerul pătrunde în apă prin gurile dotate cu valve de retur, poziționate pe fundul căzii. Bochetele airjet sunt în număr de 8 – 12, așezate pe criterii ergonomice.

It generates a smooth and relaxing massage using air jets. The air flows into the water through the openings fitted with recycling valves, located on the bottom of the bathtub. There are 8-12 Airjet jets positioned by ergonomic criteria.

Aromaterapia

Aromatherapy

Încă din antichitate, esențe extrase din plante și fructe sunt folosite în practicile curative. Microparticulele prezente în arome stimulează simțul mirosului: aroma preferată determină emoții intense în timp ce principiile active acționează pentru reechilibrarea și tonifierea organismului. Cedrul, trandafirul, portocala, menta, papaya sunt câteva esențe cu efect specific, benefic ce arată legătura profundă ce există din vechime între om și lumea vegetală.

Since ancient times the essences of plants and fruits are being used for curative purposes. The microparticles from aromas stimulate the smell: the preferred aroma determines intense emotions while the active principles help rebalancing and refreshing the body. Cedar, rose, orange, mint, papaya are only a few of the specific and healthy essences, which prove the deep and old connection between man and vegetal world.

Masaj Lombar

Lumbar massage

Trei bochete asigură un masaj localizat, relaxând zona vitală de energie a corpului. În funcție de poziția corpului dumneavoastră în cadă, aceste jeturi vă pot asigura atât masaj lombar, cât și masaj al tălpilor.

Three jets ensure a localized massage, helping relax the area with vital energy of the body. Based on the position of the body in the bathtub, these jets can perform both lumbar and soles massage.

Dezinfecție

Sanitation

Pentru o perfectă curățare a întregului sistem de hidromasaj, Aquavit a inovat un sistem de dezinfecție automată a circuitului căzii. Igiena este asigurată și de sistemul de drenaj care împiedică staționarea apei în circuit după fiecare ședință de hidromasaj.

In order to keep a perfect cleanliness of the entire hydromassage system, Aquavit innovated an automated sanitation bathtub system. The hygiene is also guaranteed by the drainage system which prevents the water to remain in the circuit after each hydromassage session.

Upgrade Pompa

Pump Upgrade

Pentru un masaj mai intens se poate monta sistemului de hidromasaj o pompă cu o putere mai mare față de cea standard (0,8Hp), de 1,1 Hp. În cazul în care cada este echipată cu un sistem complex de hidromasaj sau are multe elemente opționale solicitante de putere, la recomandarea producătorului se impune echiparea căzii cu o pompă de putere mai mare.

For a more intense massage, a more powerful pump (0.8 Hp) than the standard one (1.1 Hp) can be optionally mounted in the hydromassage system. In case the bathtub is equipped with a complex hydromassage system, or has many elements that may require more power, at the producer's recommendation, a more powerful pump becomes a must.

Sisteme de hidromasaj - cabine de duș
Hydromassage systems – shower cabins

Sistemul Steamy - shower

Steamy Shower system

- 6 jeturi de hidromasaj
 - Baterie duș
 - Deviator multifuncțional
 - Duș culisant
 - Suport șampon
 - Capac de închidere superior
 - Sauna monoclimă cu generator de aburi.
- Este acționat printr-o simplă apăsare a unei taste, determinând formarea în interiorul cabinei a aburului dens, cu efect de "baie turcească".
- Aromaterapie

- 6 hydromassage jets
 - Shower kit
 - Shower functions' diverter
 - Sliding shower
 - Shampoo support
 - Upper lid
 - Mono-climate sauna with steam generator.
- Th is system is auctioned with a simple key press, thus forming a thick steam inside the enclosure, with "Turkish bath" result.
- Aromatherapy

Sistemul Hidro - mix

Hidro - mix system

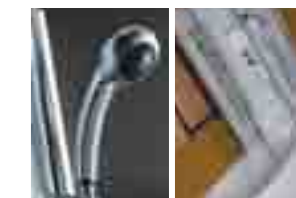

- 6 jeturi de hidromasaj
 - Baterie duș
 - Deviator multifuncțional
 - Duș culisant
 - Suport șampon
 - Capac de închidere superior
 - Saună multiclimă cu generator de aburi.
- Este acționat printr-o simplă apăsare a unei taste, determinând formarea în interiorul cabinei a aburului dens, cu efect de "baie turcească".
- Aromaterapie
 - Cromoterapie cu un spot
 - Radio cu incinte acustice ascunse
 - Alarmă

- 6 hydromassage jets
